WELCOME PACKET

Anote AI Research Fellowship

June 1 - August 10, 2026

A Note from the CEO

Dear Fellow,

Welcome to Anote - and welcome to the Anote AI Research Fellowship. Anote is a startup in New York City that has developed a new way of doing AI, called human-centered AI - to label, train, predict, and evaluate large language models. We built a platform that builds off the latest advancements in generative AI and fuses them together with human input on the edge cases, to provide a truly scalable AI solution across many domains, capabilities, and file types.

But Anote is more than that. Anote is a family - a community of researchers, builders, and entrepreneurs dedicated to learning and growing together each and every day. A team of students and recent graduates from Cornell, WashU, Stevens, and beyond, with diverse skill sets across algorithms, systems, and design. And in joining the fellowship, you are joining that family and that community, with three main tenets:

1 TEAM

Together Everyone Achieves More

The whole is greater than the sum of its parts. We enable each fellow to excel and lift each other up.

2 FUN

The Most Important Tenet

Our goal is to make this the best summer of your research career. When you love what you do, amazing things happen.

3 FRIENDSHIP

Build Your Network

Reach out to fellow researchers, schedule coffee chats, build relationships that last far beyond the fellowship.

This is not a passive program. You will do real research, ship real code, and publish real papers. We expect a lot - and we will give a lot in return.

Yours truly,

Natan Vidra

Founder and CEO, Anote

What is Anote?

Anote is an applied AI research company based in New York City. We build AI technology to provide high-quality datasets and evaluations for leading enterprises, federal clients, and model providers.

We believe there is a massive gap between the tremendous power of AI models and the everyday tasks that people and organizations actually care about. Human-centered AI is our answer to that gap.

What is the AI Research Fellowship?

The Anote AI Research Fellowship is a 10-week summer program for exceptional student researchers and engineers. Unlike a traditional internship, this fellowship is designed around research output - you will own a research question, produce a publishable paper, contribute to a real product, and present your work publicly.

June 1 - Aug 10
10 Weeks

WeWork NYC
Fridays In-Person

Hybrid Format
Remote Welcome

Real Output
arXiv + Conferences

This is not busy work. The research you produce will be submitted to real conferences and published to arXiv. The code you write will ship in Anote's products.

Your Three Deliverables

Every fellow is responsible for three things by August 10:

1. Research Paper

Choose a research topic from anote-ai/Research or propose your own. Produce a complete, publishable paper submitted to arXiv and at least one top AI conference (e.g. AAAI 2027).

2. Final Presentation

On August 5, present your summer's work in a recorded session attended by the Anote team, steering committee, and invited guests. Use the Anote slide template.

3. Product Impact

Each fellow is paired to one Anote product and expected to make it meaningfully better - new features, bug fixes, better documentation, improved performance.

Fellowship Requirements

Recurring Standups

The fellowship runs on a scrum cadence with two recurring standups each week:

Standup	Day	Time (EST)	Format
AI Research Standup	Every Tuesday	5:00-5:30 PM	Virtual
AI Product Standup	Every Thursday	5:00-5:30 PM	Virtual

Weekly Email Update

Send a brief email update to Natan and the PM at end of each week. Cover:

- What you worked on this week
- What you learned
- What's next
- Anything you need help with

These are not graded - they help surface blockers early.

Monthly One-on-Ones

Each month, you will have a scheduled 15-minute one-on-one with Natan.

- Bring questions, ideas, career goals
- Share feedback openly
- Discuss research direction
- Use the time well

These are open conversations to help you grow.

Friday Fellowship Talks

Every Friday 1:00-2:00 PM EST, a guest AI expert joins for a recorded talk.

- In-person at WeWork NYC for locals
- Remote fellows join via Zoom
- Come prepared with questions
- One of the most valuable parts

These talks connect you with industry leaders.

At Each Standup, Be Prepared to Share:

1. What you worked on since the last session
2. What you plan to work on next
3. Any blockers you need help with

Being blocked on tools in Week 1 is not acceptable. If anything is missing from your access checklist, reach out to your PM immediately.

Key Dates

Date	Event
Mon, Jun 1	Orientation - 6:00-8:00 PM EST
Every Tuesday	AI Research Standup - 5:00-5:30 PM EST
Every Thursday	AI Product Standup - 5:00-5:30 PM EST
Every Friday	Fellowship Talk at WeWork NYC - 1:00-2:00 PM EST
Wed, Jul 1	Midpoint One-on-Ones with Natan - 5:00-10:00 PM EST
Wed, Aug 5	**Final Presentations (recorded) - 5:00-10:00 PM EST**
Thu, Aug 7	**Anote Summer Party - 7:00-10:00 PM EST, NYC**
Mon, Aug 10	Last day - submit papers, document work, clean up repos

Research Talks and Background Reading

Watch these Anote research talks before the fellowship begins:

Topic	Link
Fine-Tuning LLMs	youtube.com/watch?v=mMmaTMuRZmo
Benchmarking Text Classification	youtube.com/watch?v=IakXvvdaNJQ
Benchmarking Q and A Models	youtube.com/watch?v=sppn68PirPQ
Human-Centered AI	youtube.com/watch?v=ZoAsXKLPyuo
Improving Retrieval for Q and A	youtube.com/watch?v=a2hQrg2OZ-o
Few-Shot Learning (TED Talk)	youtube.com/watch?v=7I_pBLjMNzs

Tools and Access

Your PM will provision all tools before June 1. If anything is missing, reach out immediately.

Tool	What It's For	Who Needs It
GitHub	Product repo contributions, research code	Everyone
Claude Code	AI-assisted coding for your product work	Everyone
Codex	Alternative AI coding tool	Everyone
arXiv account	Publishing your research paper	Everyone
Slack	Main communication channel	Everyone
Zoom	Virtual standups and talks	Everyone
Slides Template	Final presentation	Everyone
LaTeX / Overleaf	Writing your research paper	Everyone

The Summer Timeline at a Glance

WEEK 1

Onboarding

Jun 1-6

Orientation, meet the team, confirm research topic and product assignment, set up tools

WEEKS 2-4

Foundation

Jun 8-27

Literature review, research outline, first product sprint

WEEKS 5-7

Build

Jun 30-Jul 17

Core research work, product feature development, midpoint check-in

WEEKS 8-10

Ship

Jul 21-Aug 10

Finalize paper, prepare presentation, polish product work, celebrate
